Work History

Senior Webmaster

Blue Corona, Charlotte, NC

- Planned website development, converting mockups into usable web presence with HTML, JavaScript, SASS, CSS and PHP. Can also use Git.
- Provided front-end website development using WordPress, Hubspot and other editing softwares.
- With PHP, created multiple features using custom fields, post types, and widgets.
- Collaborated with the design team to create real experiences using PSD mock-ups provided by InVision & Figma.
- Ran debugging tools such as Chrome Inspector to eliminate flaws and glitches prior to publishing.

2019-09 - Current

2018-03 - 2018-08

- Gained Wordpress backend and coding experience from hundreds of different clients and websites (Over 200+).
- Optimized websites for site speed using Google's core web vitals standards. Testing done via extensions, GTmetrix, and Pagespeed Insights.
- Collaborated with the SEO team to employ search engine optimization tactics to increase reach of targeted audience.
- Using WP Engine as a hosting provider, successfully launched multiple websites from development environments.

Education

● **Certification: Coding Bootcamp**

UNC Charlotte - Charlotte, NC

Accomplishments

- Achieved site speed improvement for our company's official website by ~47% by completing identifying and implementing core web vital improvements with accuracy and efficiency, gaining a GTmetrix score of a B on desktop and mobile at its peak.
- Custom-built a plugin to properly lock down a website for staging work, and another to insert site schema for the SEO team.
